**MIS portal** is a web application that enables every Internet user to acquire information on mine hazardous areas in Croatia. This kind of Geographical Informational System of the mine hazardous areas, provided through a web app which integrates the display and positions of Mine warning signs is unique in the world.

Within the framework of the project "Demining, Restoration and Protection of Forests and Forestland in Protected and Natura 2000 Sites in Danube-Drava Region - NATURAVITA", 25.39 km² of mine suspected areas have been demined. Within the scope of mine risk awareness activities, educational programs have been developed for school children, students and the local population.

## APRIL 4 - INTERNATIONAL DAY FOR MINE AWARENESS AND ASSISTANCE IN MINE ACTION

**At its 60th session in December 2005, the United Nations General Assembly adopted a Resolution on Assistance in Mine Action, declaring 4 April as the International Day for Mine Awareness and Assistance in Mine Action.**

**Since 2002, at the initiative of the Croatian Mine Action Centre, April has been marked as the Mine Protection Month.**

April is the month we usually spend in our gardens and backyards, clearing overgrown fields and organising trips in nature. Therefore, there is a need in April to remind the public of the still present mine risk.
